

Pulp and Paper Mill Kawerau. New Zealand

FIBREGLASS FUME EXTRACTION COVERS

GRP Covers over the bleach washer tanks at the Tasman Pulp and Paper, Kawerau mill, contain the fumes given off in the mixing process within the tanks, for extraction to a scrubbing system.

The covers are exposed to the aggressive, chemical bleaching environment within the tanks, including chlorine dioxide.

The tank cover design was completed by Maskell engineers. Covers manufactured from vinyl ester resin, E-glass reinforcement with gelcoat externally.

Industry Sector:	Pulp and Paper
Dimensions:	Over 4m x 2m
Construction:	Molded
Resin:	Vinyl Ester
No. off:	4
